To whom it may concern:

I would like to build a 2 car garage and work shop with the a bonus room (Home office space) on the second level. The second level would be at grade with the road (Books Pt. Lane) The garage level would be at grade with the existing driveway. This would be considered below the road grade .

This structure would have no change to the surrounding area. Numerous houses on the street have detached garages.

I am requesting a Variance because the building would be less than the required distance from the state road. While I have considered other locations on the property for the garage, there are several reasons this could not be done.

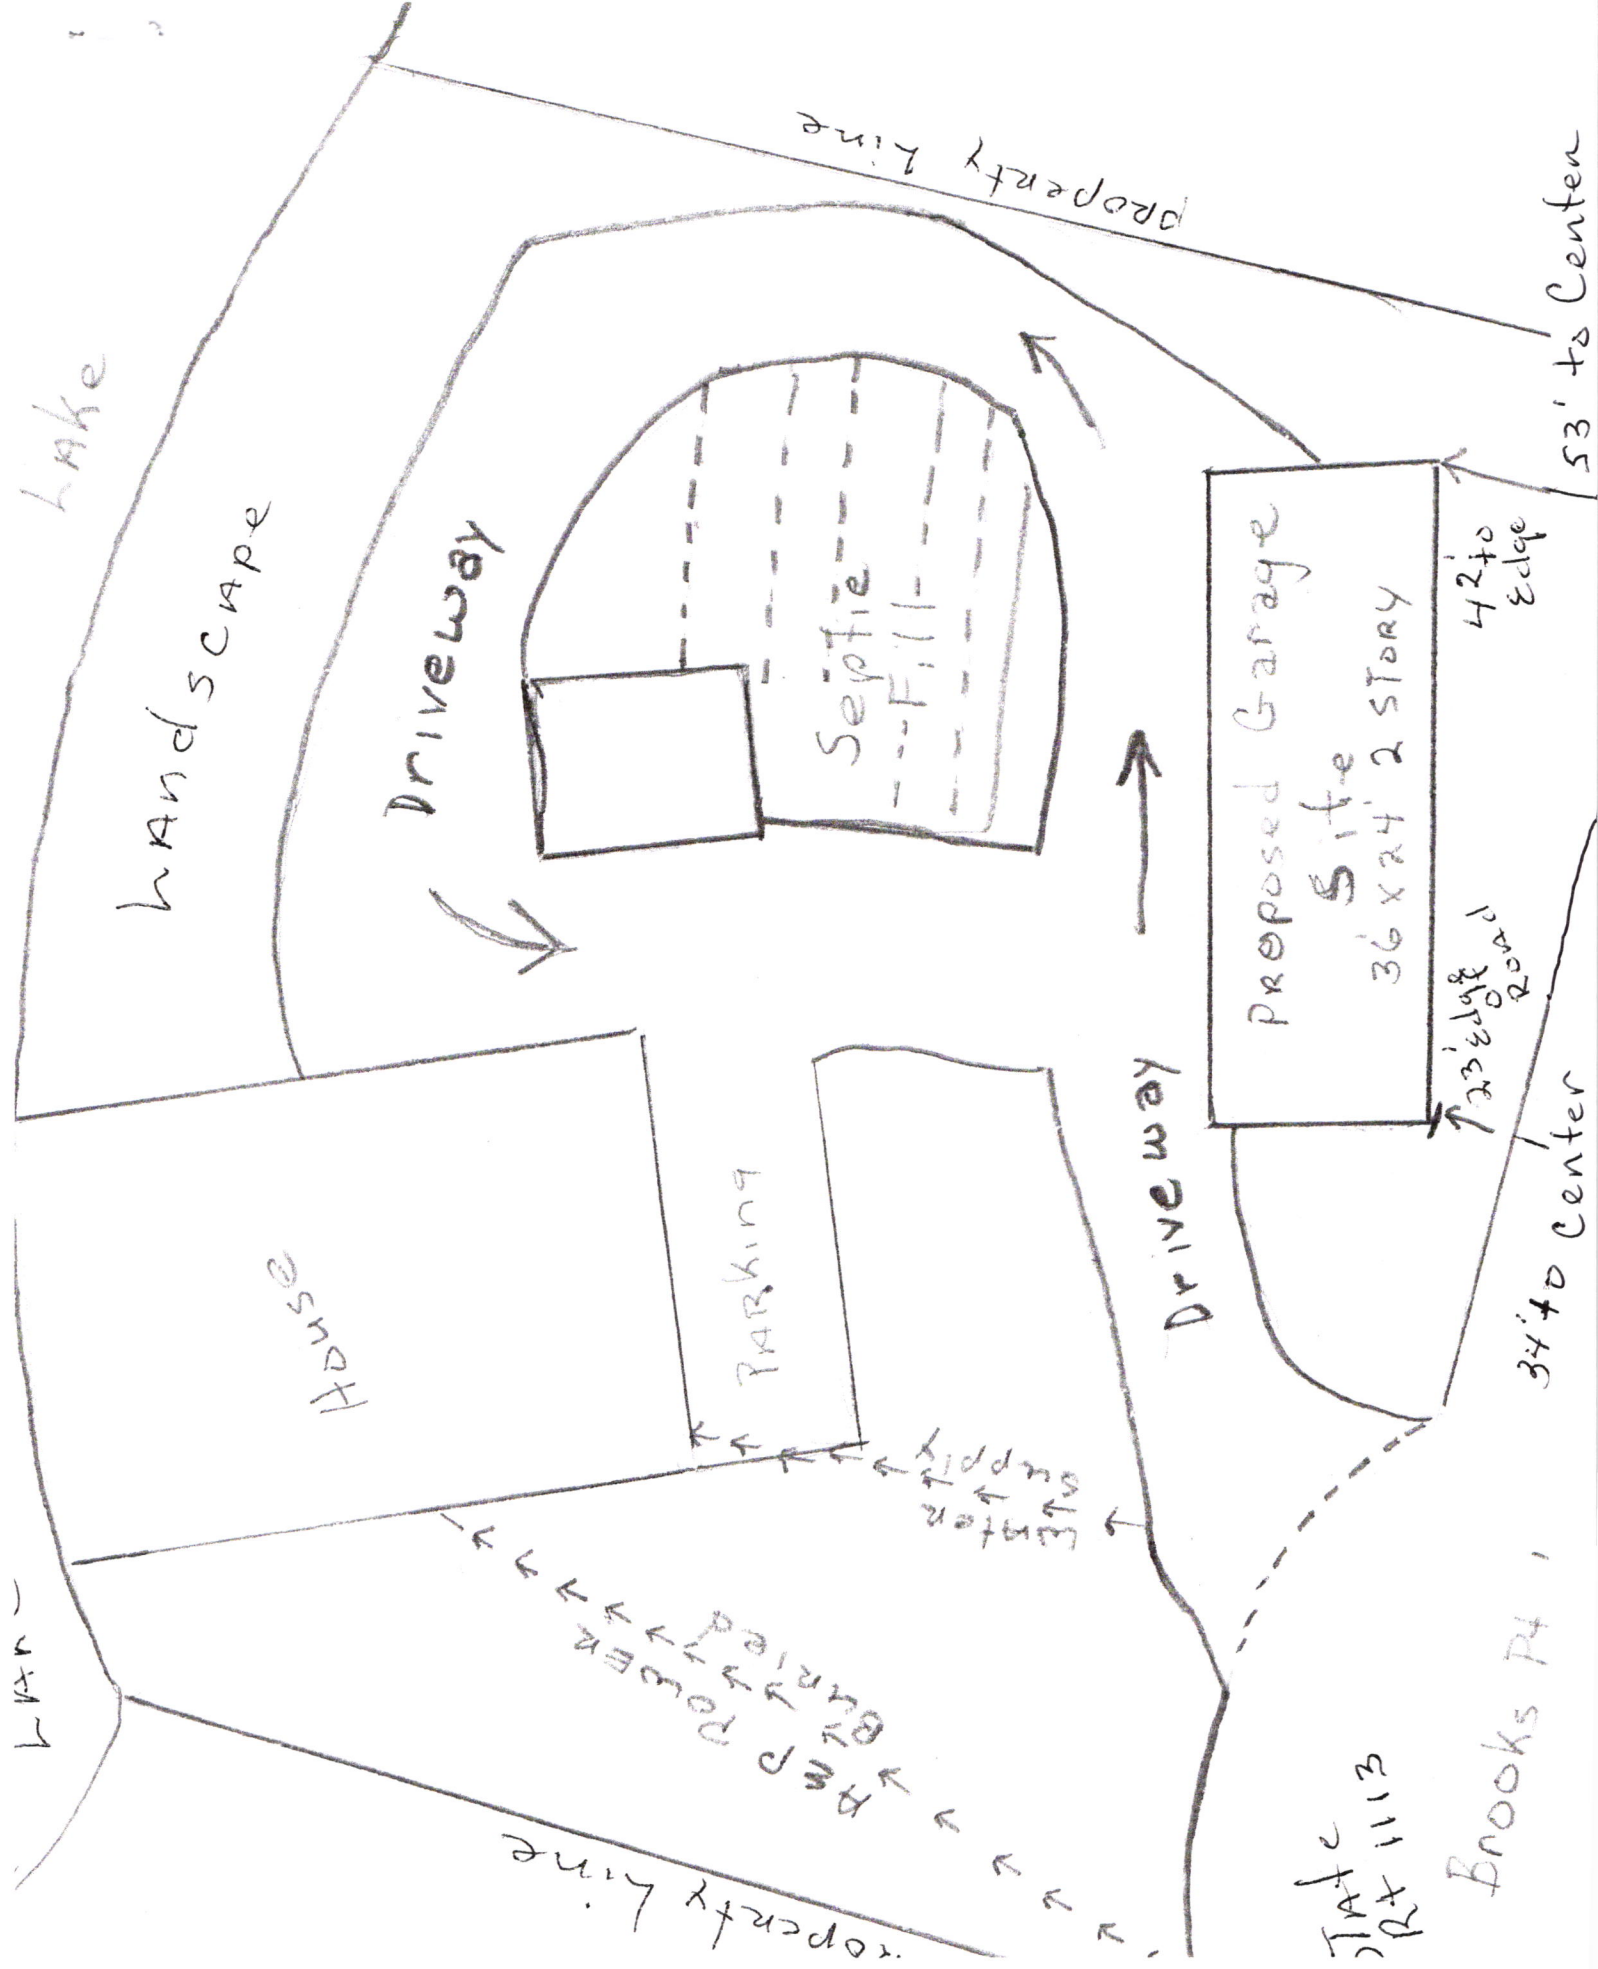

1. The electric and water utilities are buried in one of the spots considered.
2. The septic system is in the other spot considered.
3. The driveway is close to one of the adjoining properties and would block the neighbors view.

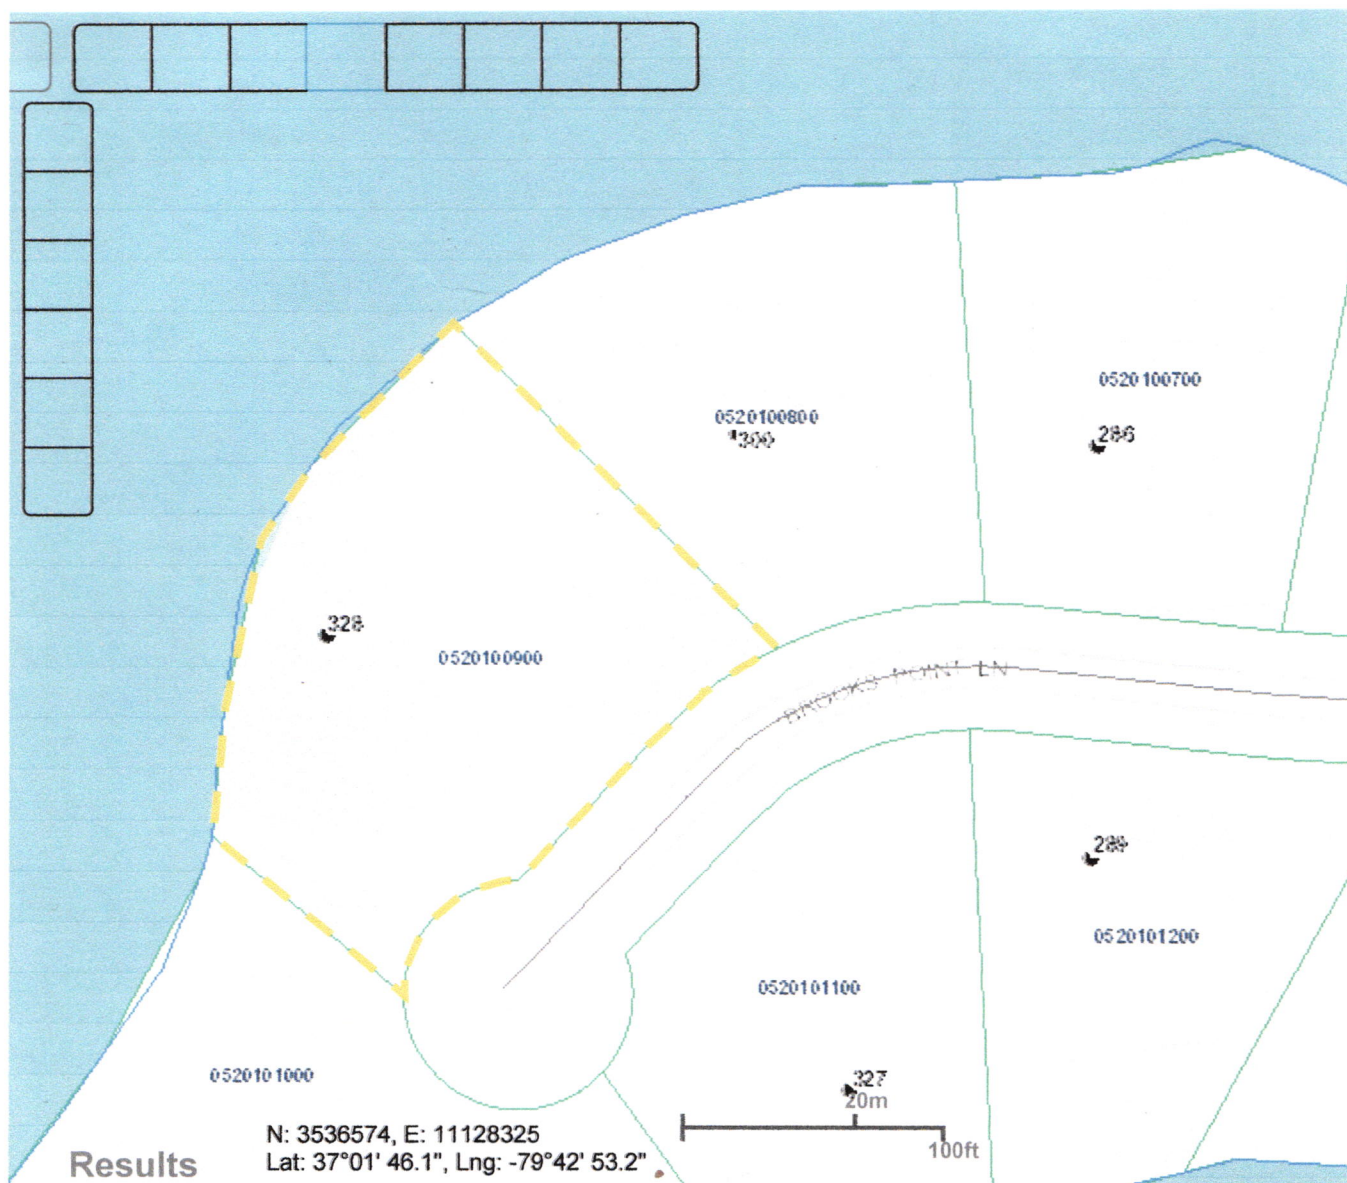

While the construction would require the removal of 2 trees, these 2 trees are very close to the power lines. The grading required would be minimal due to the fact that the area where the garage would be built is already dug out and is used for parking.

Thank you for considering my request for a variance.

Sincerely,

Ed & Debbie Crawford
